

RE VITA LIZE

TREATMENT
PROTOCOLS

GLOW INSIDE-OUT AND OWN YOUR CONFIDENCE ALONG THE BEAUTY JOURNEY!

The Beauty Journey encourages you and your clients to combine great skincare, effective professional treatments, and superb facial contouring to enhance natural beauty. By promoting the Beauty Journey circle in your clinic, you are offering clients the full package.

WHAT IS THE SECRET OF THE REVITALIZE SUCCESS?

- The 9 different professional serums are compatible with most cosmetic and aesthetic protocols and equipment
- Immediate, visible-looking improvements can be achieved through naturally balanced cocktails
- Multiple skin concerns can be supported (e.g., the appearance of scars, acne-prone skin, and uneven tone)
- Unique innovation designed to enhance overall treatment outcomes
- Most serums can be combined to tailor sessions to your client's individual needs
- Color codes make choosing the right serums easy
- Lovable design with powerful messages
- Our success comes from YOU – innovation based on feedback from Revitalize experts

HOW TO USE THIS BOOKLET

This booklet provides:

- 1) Universal steps that apply to most Revitalize Professional Serums
- 2) A Protocol Navigator to choose and combine serums with confidence
- 3) Product pages with treatment plans and product-specific settings

IMPORTANT

Revitalize Professional Serums are designed for PROFESSIONAL USE ONLY and topical application with device-assisted techniques (e.g., microneedling and electroporation). DO NOT INJECT.

PROFESSIONAL USE & SAFETY (READ BEFORE USE)

- **PROFESSIONAL USE ONLY.**
- **TOPICAL USE ONLY. DO NOT INJECT.**
- **PATCH TEST:** Perform a patch test 24 hours prior to the first treatment.
- **EYE CONTACT:** Avoid contact with eyes. If contact occurs, rinse immediately with plenty of water.
- **ALLERGIES:** Do not use if the client is allergic to any ingredient.
- **HYGIENE:** Follow local hygiene and infection-control standards. Use sterile, single-use consumables.
- **STORAGE:** Store under 25°C in a dry place. Do not expose to direct sunlight. Keep the serums and equipment out of children's reach.

ALWAYS DO A PATCH TEST

Lightly pierce the skin superficially behind the ear or on the forearm with a sterile needle/lancet, apply a tiny droplet of the product (or the prepared mixture, if mixing is required), and leave in place for a minimum of 24 hours. **If the skin reacts, do not proceed.**

CONTRAINDICATIONS

Before performing any Revitalize serum treatment, ensure that the client has none of the following contraindications. Do not proceed if the client:

- **Pregnancy or Nursing:** Is pregnant or breastfeeding.
- **Allergies:** Has a known allergy or hypersensitivity to any of the serum's ingredients. Always review the ingredient list of the chosen Revitalize product. If unsure, perform a patch test 24 hours prior.
- **Active Skin Infections or Conditions:** Has any active infection, inflammation, or uncontrolled skin condition at the treatment area. This includes active acne with pustules, cold sores (herpes simplex), warts, fungal infections, or dermatitis/eczema flare-ups on the area to be treated.
- **Open Wounds or Recent Surgery:** Has open wounds, cuts, or has recently had surgery in the treatment area. The skin must be fully healed before microneedling. Scars less than 3 months old or stitches in the area are also contraindicated.
- **Tendency to Keloid or Hypertrophic Scarring:** Has a personal or family history of keloid scars or hypertrophic scar formation.
- **Recent Procedures:** Has undergone deep chemical peels, laser resurfacing, or other aggressive skin treatments on the area within the past 2–4 weeks.
- **Accutane/Isotretinoin Use:** Is currently on or has used oral isotretinoin (Accutane) in the last 6 months. Wait at least 6 months after completion before microneedling.
- **Medical Conditions:** Has uncontrolled diabetes or poor wound healing, autoimmune diseases, or is immunosuppressed. These conditions can affect recovery and increase risk of complications. Similarly, clients with blood coagulation disorders or those on significant anticoagulant therapy may experience excessive pinpoint bleeding or bruising (consult with medical director).
- **Other Contraindications:** Severe chronic illnesses that are unmanaged, active cancer or chemotherapy, or any condition the client's physician has advised may make skin treatments unsafe. When in doubt, obtain medical clearance.

UNIVERSAL PREPARATION & CLEANSING

(Referenced in product protocols as: "Prepare & Cleanse")

1) Consultation & skin check

- Confirm indication and suitability. Review ingredient sensitivities and client history.
- Explain expected downtime (temporary redness, sensitivity; possible mild swelling/bruising depending on device).
- Obtain informed consent according to local practice.

2) Prepare the workspace

- Clean and disinfect the treatment area and surfaces.
- Wear appropriate PPE. Use sterile, single-use consumables.

3) Cleanse

- Cleanse the skin thoroughly with a suitable cleanser (e.g., micellar cleanser).
- Gently blot dry.

4) Optional topical anesthetic

- Apply topical anesthetic cream if required (based on area sensitivity and device intensity).
- Typical waiting time: 15–20 minutes.

5) Remove anesthetic + re-cleanse

- Remove topical cream with gauze and warm water.
- Double-cleanse using a suitable cleansing solution and blot dry.

6) Final preparation

- If needed, mask/protect the treatment field with clean gauze and maintain aseptic handling.
- Ensure the skin is dry and ready for topical product placement.

DOSE GUIDE & SPLIT RULE

STANDARD DOSE

- 1.0 ml per 10 × 10 cm treatment area.

TYPICAL EXAMPLES

- **Full face:** commonly 2–3 ml total (based on skin condition, technique, and practitioner judgement).
- **Larger body areas:** scale proportionally to surface size.

SPLIT RULE (FOR TWO-PASS APPLICATION)

- Split the prepared amount into TWO EQUAL PARTS:
 - » First half
 - » Second half

UNIVERSAL APPLICATION FLOW

1

Prepare & Cleanse

Follow "Universal Preparation & Cleansing".

2

Dose & Split

- Draw up the required amount using a sterile syringe and needle following the "Dose Guide & Split Rule"
- Remove the needle and use the syringe as a sterile applicator for topical placement.

Amount of solution:
1ml per 10 x 10 cm

3

Topical placement

- Deposit droplets onto the treatment area.
- Spread evenly using a cotton bud or a sterile gloved finger.

4

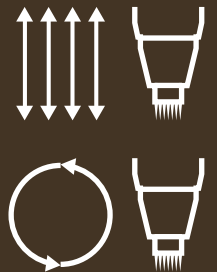

Application

Pass 1 – FIRST HALF

- Apply and work in the FIRST HALF of the prepared serum amount.
- Use controlled coverage (vertical + horizontal lines).

Pass 2 – SECOND HALF

- Apply the SECOND HALF of the prepared amount.
- Reduce device intensity to approximately 50% (depth and/or speed) compared with Pass 1, unless a product protocol specifies otherwise.
- Use a circular motion for refinement.

5

Finish

- Gently massage any remaining product into the skin.
- Allow to dry naturally.
- Follow "Universal Aftercare" (high SPF recommended).

UNIVERSAL AFTERCARE (POST-TREATMENT)

- Keep the treated area dry for 24 hours.
- Avoid makeup, abrasive products, and active-heavy skincare for 24 hours (unless your professional routine advises otherwise).
- Avoid alcohol, intense exercise, and extreme temperatures for 48 hours.
- Avoid sun exposure; apply a high SPF after the session and continue daily UV protection.
- Avoid sun-beds, saunas, and steam rooms until the skin is fully settled.
- If undue discomfort occurs, advise the client to contact the practitioner.

HOME AFTERCARE & MAINTENANCE: OH! CREAMS

To support post-treatment comfort, strengthen the skin barrier, and help prolong the results of Revitalize professional serum protocols, we recommend integrating the Oh! daily skincare routine as the preferred home aftercare. Oh! was developed by My Med Aesthetics as a simplified, high-performance cream line designed to meet the skin's needs especially after device-assisted aesthetic procedures (e.g., microneedling) and to maintain long-term skin quality.

Why recommend Oh! after treatment

Oh! focuses on what skin typically needs during recovery and consolidation:

- Supports optimal cell turnover and helps reinforce a resilient-looking skin barrier.
- Includes proven antioxidants to support an anti-aging effect and protect skin quality long term.
- Developed with a "less is more" philosophy: formulated to omit unnecessary ingredients, particularly those considered irritating or undesirable after procedures (e.g., parabens, petrochemical substances, harsh preservatives).
- Built on natural-origin components and scientifically backed actives, positioned to help keep results working beyond the in-clinic session.

When to start

Begin the Oh! routine after the first 24 hours, once the skin is intact and the initial post-treatment sensitivity has settled, while continuing the standard protocol recommendations (strict sun avoidance and daily high SPF).

Suggested home routine (simple and clinic-friendly)

- **AM – Oh! My Beautiful Day (Day Cream):** A fast-absorbing daily moisturizer designed for a fresh, hydrated finish. Key actives include EGF, Resveratrol, "Stem Cells" (as described in the brochure), and Hyaluronic Acid to support hydration, radiance, and a smoother-looking complexion.
- **PM – Oh! My Beauty Sleep (Night Cream):** A richer night formula designed to restore a youthful-looking appearance and support the protective barrier. Key actives include EGF, Magnolia extract (anti-inflammatory support), Hyaluronic Acid, and Anthocyanins for protective anti-aging support.
- **AM/PM – Oh! My Magic Eyes (Eye Cream-Gel):** Targeted care for the delicate eye area with a visibly tightening, refreshing effect and support for the appearance of eye bags. Key actives include Resveratrol, Magnolia extract, Fermented sugars, and Anthocyanins.

Professional recommendation note

Encourage consistent daily use for best long-term outcomes: Oh! is positioned as an aftercare choice that helps maintain hydration, comfort, and visible skin quality—supporting clients in preserving and extending their professional results at home.

REVITALIZE PEN

Protocol-Driven Microneedling Device for Revitalize Professional Serums

The Revitalize Pen is the standard device used across Revitalize Professional Serum protocols to support consistent, repeatable, device-assisted application. Its key advantage in the protocol booklet context is controlled depth and speed, allowing the trained professional to follow each protocol precisely while adapting safely to the client's skin condition, treatment area, and tolerance.

Designed for professional daily use, the Revitalize Pen features an ergonomic, anatomical shape for stable handling and smooth movement during linear and circular passes.

Revitalize pen settings guide (general)

These ranges are general guidance. Final settings must be selected by the trained professional based on skin condition, area, and tolerance, and the device manufacturer instructions.

- **Face:** 0.25–1.5 mm
- **Body:** 2.0–2.5 mm
- **Sensitive areas / reactive skin:** reduce depth and speed accordingly

Speed Selection (Protocol Color Code)

Use the Revitalize Pen at the speed recommended in each protocol, according to the color code:

● **Red = Fast** ● **Blue = Medium** ● **Green = Slow**

REVITALIZE LASER COMB

Laser + Vibration Delivery Tool for Revitalize Hair

The Revitalize Laser Comb is an advanced professional device developed to enhance the scalp application of Revitalize Hair serum, combining smart serum distribution with supportive technologies for optimized absorption and scalp stimulation. Designed to make professional hair-care sessions faster and more consistent, it provides a practical solution for clinics that want a clean, repeatable workflow and a premium client experience.

Application is simple: fill the integrated container with Revitalize Hair serum, then comb through the scalp. The device features an innovative bead-based distribution system that helps deliver serum evenly across the scalp during combing, supporting consistent coverage and efficient product use.

Each session is streamlined with a built-in 9-minute auto-timer, making treatment duration predictable and easy to standardize in professional practice.

When paired with Revitalize Hair Serum, it offers a convenient, technology-driven method to support a comprehensive professional hair-care program.

PROTOCOL NAVIGATOR: CHOOSING THE RIGHT SERUM

Revitalize offers a range of specialized serums, each formulated to target specific skin concerns and conditions. This Protocol Navigator will help you determine which Revitalize serum (or combination protocol) is best suited for your client based on their primary concerns.

Indication	Product to use
<p>Advanced Regeneration, Collagen Support & Visible Firming (Deeper Renewal): If your client's main concern is more advanced skin aging—loss of firmness, pronounced dehydration, low collagen performance, visible wrinkles, or sagging. Indications: deep regeneration, hydration restoration, collagen and elastin support, and structural renewal for photoaged or compromised skin. Use Exosome.</p>	
<p>Post-Procedure Healing, Stubborn scars or active acne with scarring tendency: If a client is undergoing treatments that cause microdamage (like laser, peel). Also for pitted acne scars on the face, or stretch marks on the body, or even improving the appearance of an old surgical scar. Indications: speeding up dermal repair and regeneration. Use Booster.</p>	
<p>Deep Hydration, Fine Lines & Skin Plumping (Skin Booster effect): For clients seeking an intense hydration boost, fine line filling, and a dewy, plumped complexion – essentially a result akin to skin booster injections. Indications: restoring elasticity and providing long-lasting hydration, smoothing fine lines. Use Essence.</p>	
<p>General Skin Rejuvenation & Texture Improvement: If your client has dull skin, uneven texture, fine lines, or minor scars. Indications: improving skin texture, boosting collagen, aiding in repair of imperfections (like post-acne marks or stretch marks). Use Pure.</p>	
<p>Dull, Tired or Nutrient-Depleted Skin: For clients concerned with loss of radiance, sallow complexion, or signs of stress/aging due to lifestyle (smoking, poor diet, sun exposure). Indications: revitalizing and illuminating the skin. Use Vitamins.</p>	
<p>Loss of Firmness & Sagging (Facial or Body Skin Laxity): If the primary issue is skin laxity – for example, mild jowling, sagging cheeks, loose skin on the neck, or post-weight loss laxity on body. Indications: flaccidity, slack skin, stretch marks, including after effects of weight change or after pregnancy. Use Body.</p>	
<p>Hair Thinning & Hair Loss: If the client's concern is related to hair – thinning hair, androgenetic alopecia (male or female pattern baldness), or wanting to improve hair transplant results. Indications: nourishing the scalp, strengthening hair follicles, promoting new growth. Use Hair.</p>	
<p>Localized Fat Deposits & Cellulite: For body contour concerns, like small pockets of stubborn fat (double chin, abdomen pooch, love handles, thighs) and cellulite appearance, choose Revitalize Slim. Indications: localized adiposity and cellulite reduction. Use Slim.</p>	
<p>Hyperpigmentation & Dark Spots: For issues of skin discoloration – such as melasma, sun spots, post-inflammatory pigmentation. Indications: reducing pigmentation spots and evening out skin tone. Use Bright Skin.</p>	

COCKTAIL CHART:

Serum Combinations for Tailored Treatments

To maximize outcomes and tailor sessions to your client's needs, you can create serum cocktails. While each Revitalize serum is powerful on its own, certain skin concerns benefit from a combination of active solutions. "Cocktails" refer to custom mixes of two (or more) Revitalize products in the same treatment, yielding synergistic effects. These cocktails have been developed to maximize outcomes for specific problems. Mixing Rules: In general, you may mix two serums in a single syringe/dispensing device and apply them together with the microneedling protocol – provided they are compatible. Do not mix more than 2 products in one cocktail (to ensure predictable results and avoid ingredient overload). Ensure the total volume in your mix is suitable for one session

Mixing rules (critical)

- **Booster:** not a standalone product. Always mix with **Pure** or **Hair**. Never apply alone.
- **Essence, Exosome:** never mix with any other serum.

Here are the key **Revitalize Cocktails** and their uses:

Combination	Vials/ampoules used	Indication
	1 amp. Booster : 1 vial Hair	Diffuse hair loss appearance, thinning, density support
	2 amp. Booster : 1 vial Pure	Scars (acne scars, surgical scars, scars after injury) and active acne
	1 vial Pure : 1 vial Vitamins	For tired, dull, lifeless, grey, skin that has lost its glow
	1 vial Slim : 1 vial Body	Fat reduction and toning, tightening at the same time (arms, abdomen, buttocks double chin)
	1 vial Pure : 1 vial Body	Hydration and toning for a face that is slightly wrinkled and has lost its tone in the process
	1 vial Pure : 1 vial Bright Skin	It hydrates and lightens at the same time in cases where hyperpigmentation has occurred
	1 vial Vitamins : 1 vial Bright Skin	Removes skin spots and nourishes the skin at the same time
	1 vial Vitamins : 1 vial Body	Tightens skin with the addition of a nourishing effect

EXOSOME.

PLANT-DERIVED EXOSOMES
- DEEPER THAN EVER

Indication:

Revitalize Exosome is indicated for dehydrated, low-elasticity skin that needs deeper regeneration – it restores hydration and collagen production and helps firm sagging skin. Plant-derived exosomes also enhance cellular communication and repair, supporting post-procedure renewal and barrier reinforcement. (Use on face, neck, hands, décolletage, scalp or body areas as needed.)

Professional application:

Apply to face, neck, décolletage and hands using device-assisted techniques such as microneedling or electroporation. Using the Revitalize Pen may speed up visible results.

Treatment plan:

Treatment: 1 session every 15 days, 6–8 sessions (according to results)
Maintenance: 1 session every 60 days

Contents (INCI):

Aqua, Glycerin, Crocus Sativus Callus Extracellular Vesicles, Olea Europaea Callus Extracellular Vesicles, Sodium Hyaluronate, Sodium Chloride, Sodium Hydroxide, Phenoxyethanol, Ethylhexylglycerin.

Packaging:

2 vials, 5 ml each.

Formula highlights:

Harnessing Crocus Sativus (Saffron) and Olea Europaea (Olive) cell cultures, the extracellular vesicles (exosomes) act as natural carriers of regenerative signals.

- **Saffron-derived exosomes** support deep repair signaling and help promote a firmer, smoother-looking appearance.
- **Olive-derived exosomes** support regeneration signaling and help improve the look of photodamage and elasticity.

Each 5 ml vial contains approximately 450 million exosomes (based on a 0.6% suspension concentration).

EXOSOME PROTOCOL

1

Prepare & Cleanse

Follow "Universal Preparation & Cleansing".

2

Dose & Split

Follow "Dose Guide & Split Rule"
(1.0 ml per 10 × 10 cm; split into first half / second half).

Amount of solution:
1ml per 10 x 10 cm

3

Topical placement

- Deposit droplets onto the treatment area.
- Spread evenly using a cotton bud or a sterile gloved finger.

4

Application

- **PASS 1 (FIRST HALF):**
 - » Face: 0.25–1.5 mm
 - » Body (if applicable): 2.0–2.5 mm
 - » Speed: fast (as tolerated)
 - » Pattern: vertical + horizontal lines
- **PASS 2 (SECOND HALF):**
 - » Reduce depth and speed to 50% (medium)
 - » Pattern: circular motion

Depth:
Face: 0.25-1.5 mm
Body: 2-2.5 mm
Speed: fast

Depth: reduce by 50%
Speed: medium

5

Aftercare

Follow "Universal Aftercare" (high SPF recommended).

BOOSTER.

UNIQUE REGENERATION

Indication:

Revitalize Booster supports dermal repair and helps increase the skin's natural self-regeneration rate by signaling the skin to repair itself more rapidly – much like what happens after an injury when the body sends growth factors to heal the wound.

Professional application:

Apply to face, neck, décolletage and hands using device-assisted techniques such as microneedling or electroporation. Using the Revitalize Pen may speed up visible results.

DO NOT INJECT! ALWAYS MIX WITH REVITALIZE PURE OR REVITALIZE HAIR!

Treatment plan:

1 session every 7 days, maximum 6 sessions (according to results)

Contents (INCI):

Epidermal Growth Factor (EGF)

Packaging:

4 ampoules, 1 ml each.

Formula highlights:

Growth factors are naturally produced when skin repair is needed. Revitalize Pen assisted techniques rely on controlled stimulation that supports the skin's renewal response. **Revitalize Booster** contains Epidermal Growth Factor (EGF), composed of 53 amino acids widely present in the skin.

Booster mixing (required):

- Mix the contents of 2 ampoules of **Revitalize Booster** into:
 - » 1 vial of **Revitalize Pure** (for skin protocols), **OR**
 - » 1 vial of **Revitalize Hair** (for scalp protocols).
- Shake until a homogeneous solution forms.
- Use the mixed solution immediately, following professional hygiene standards.

BOOSTER PROTOCOL

1

Prepare & Cleanse

Follow "Universal Preparation & Cleansing".

**DO NOT INJECT
BOOSTER!**

2

Dose & Split

Follow "Dose Guide & Split Rule"
(1.0 ml per 10 × 10 cm; split into first half / second half).
Always mix with Revitalize Pure or Hair!

Amount of solution:
1ml per 10 x 10 cm

3

Topical placement

- Deposit droplets onto the treatment area.
- Spread evenly using a cotton bud or a sterile gloved finger.

4

Application

- **PASS 1 (FIRST HALF):**
 - » Face: 0.25–1.5 mm
 - » Body (if applicable): 2.0–2.5 mm
 - » Speed: fast (as tolerated)
 - » Pattern: vertical + horizontal lines
- **PASS 2 (SECOND HALF):**
 - » Reduce depth and speed to 50% (medium)
 - » Pattern: circular motion

Depth:
Face: **0.25-1.5 mm**
Body: **2-2.5 mm**
Speed: **fast**

Depth: **reduce by 50%**
Speed: **medium**

5

Aftercare

Follow "Universal Aftercare" (high SPF recommended).

SPECIFIC BOOSTER TECHNIQUES

The following four treatment types use the same standard Booster protocol. Only the specific modifications are listed below. Please apply these adjustments to the universal Booster procedure as needed.

ANTI AGE

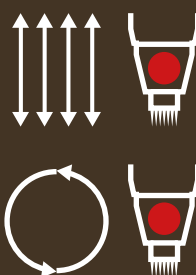

- First week:
- Week 2-5:
- Week 6:

Revitalize Booster and Pure for one session.
Revitalize Pure only for one session per week.
Revitalize Booster and Pure for one session.

A targeted Booster-enhanced protocol for early to moderate signs of aging, supporting visible smoothness and a firmer-looking appearance through regeneration-focused stimulation. Use when the primary goal is overall rejuvenation and texture refinement.

Mix with Revitalize Pure on the first and the last week.

- **PASS 1 (FIRST HALF):**
 - » Depth: 0.75 mm
 - » Speed: fast (as tolerated)
 - » Pattern: vertical + horizontal lines
- **PASS 2 (SECOND HALF):**
 - » Pattern: circular motion

Depth: 0.75 mm
Speed: fast

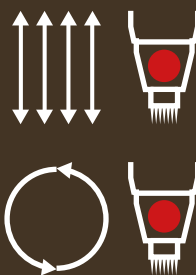

ACNE SCARS

One session per week for a maximum of 6 weeks.

An intensive Booster modification intended for atrophic acne scars and uneven post-acne texture, aiming to support collagen remodeling and surface smoothing. Use when scarring and texture irregularities are the dominant concern.

Mix with Revitalize Pure.

- **PASS 1 (FIRST HALF):**
 - » Depth: 1.0-1.5 mm
 - » Speed: slow
 - » Pattern: vertical + horizontal lines
- **PASS 2 (SECOND HALF):**
 - » Pattern: circular motion

Depth: 1.0-1.5 mm
Speed: fast

Revitalize Booster is a high-impact protocol enhancer used to amplify the skin or scalp's renewal response when added to the recommended base serum. It is ideal for upgraded programs where stronger, more accelerated-looking results are desired.

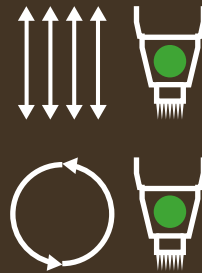

ACTIVE ACNE

One session per week for a maximum of 6 weeks.

A gentler Booster modification designed for acne-prone, inflamed or reactive skin where tolerance is the priority. It supports skin renewal while minimizing excessive irritation by using more conservative device parameters.

Mix with Revitalize Pure.

- **PASS 1 (FIRST HALF):**
 - » Depth: 0.25-0.50 mm
 - » Speed: slow
 - » Pattern: vertical + horizontal lines
- **PASS 2 (SECOND HALF):**
 - » Pattern: circular motion

Depth: 0.25-0.50 mm
Speed: slow

REGENERATOR

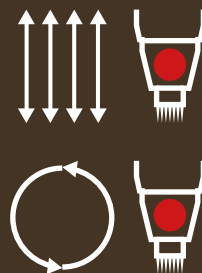

- First 3 weeks:
- Second 3 weeks:

Revitalize Booster and Pure for one session per week.
Revitalize Vitamins for one session per week.

A structured 6-week regeneration plan combining Booster + Pure in the first phase, followed by Vitamins to consolidate radiance and recovery. Recommended when the objective is accelerated renewal plus a brighter, more revitalized skin appearance.

Mix with Revitalize Pure.

- **PASS 1 (FIRST HALF):**
 - » Depth: 0.75 mm
 - » Speed: fast (as tolerated)
 - » Pattern: vertical + horizontal lines
- **PASS 2 (SECOND HALF):**
 - » Pattern: circular motion

Depth: 0.75 mm
Speed: fast

ESSENCE.

IMMEDIATE AND
LONG-LASTING RESULTS

Indication:

Ideal for restoring elasticity and providing deep, long-lasting hydration. Use **Revitalize Essence** for clients with fine lines, crepey skin, or chronic dryness who need more than what a regular serum can offer.

Professional application:

Apply to face, neck, décolletage and hands using device-assisted techniques such as microneedling or electroporation. Using the Revitalize Pen may speed up visible results.

Treatment plan:

Treatment: 1 session every 15 days, 6–8 sessions (according to results)
Maintenance: 1 session every 60 days

Contents (INCI):

Sodium Hyaluronate Crosspolymer – 52.5 mg/vial
Sodium Acetylated Hyaluronate – 6.5 mg/vial
Hydrolyzed Sodium Hyaluronate – 1 mg/vial
Sodium Hyaluronate – 5 mg/vial

Packaging:

2 vials, 5 ml each.

Formula highlights:

It's indicated for improving skin density – so those in their late 30s and above with early signs of volume loss or “crepeyness” on cheeks, under eyes, or neck are great candidates. Also excellent for anyone desiring a dewy, youthful glow with subtle plumping. Essence will help smooth fine wrinkles (like superficial crow's feet, smile lines, neck lines) and impart a firmer feel to the skin. It is suitable for all skin types, including aging or photo-damaged skin that has lost bounce. Basically, whenever a potent skin booster effect is desired, choose Essence.

ESSENCE PROTOCOL

1

Prepare & Cleanse

Follow "Universal Preparation & Cleansing".

2

Dose & Split

Follow "Dose Guide & Split Rule"
(1.0 ml per 10 × 10 cm; split into first half / second half).

Amount of solution:
1ml per 10 x 10 cm

3

Topical placement

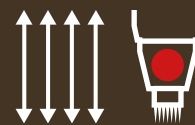

- Deposit droplets onto the treatment area.
- Spread evenly using a cotton bud or a sterile gloved finger.

4

Application

- **PASS 1 (FIRST HALF):**
 - » Face: 0.25–1.5 mm
 - » Body (if applicable): 2.0–2.5 mm
 - » Speed: fast (as tolerated)
 - » Pattern: vertical + horizontal lines
- **PASS 2 (SECOND HALF):**
 - » Reduce depth and speed to 50% (medium)
 - » Pattern: circular motion

Depth:
Face: 0.25-1.5 mm
Body: 2-2.5 mm
Speed: fast

Depth: reduce by 50%
Speed: medium

5

Aftercare

Follow "Universal Aftercare" (high SPF recommended).

PURE.

THE EXPERT IN SKIN
IMPERFECTIONS

Indication:

Revitalize Pure is indicated for all skin types that need to regenerate texture and tone. Use it for: acne scars (post-acne atrophic scars), scar prevention in acne-prone skin, stretch marks (striae distensae, whether new or old), surgical or injury scars (once healed, to improve their appearance), fine lines and early wrinkles, rough or uneven skin texture, enlarged pores, and general loss of skin firmness.

Professional application:

Apply to face, neck, décolletage and hands using device-assisted techniques such as microneedling or electroporation. Using the Revitalize Pen may speed up visible results.

Treatment plan:

Treatment: 1 session every 15 days, 6–8 sessions (according to results)
Maintenance: 1 session every 60 days

Contents (INCI):

Sodium Hyaluronate – 12 mg/ml, Hydrolyzed Collagen – 5%

Packaging:

5 vials, 5 ml each.

Formula highlights:

In summary, if the skin needs repair, restructuring, or strengthening, Revitalize Pure is indicated. It's often part of combined approaches (like alternating with other serums or after peels) because of its broad benefits.

PURE PROTOCOL

1

Prepare & Cleanse

Follow "Universal Preparation & Cleansing".

2

Dose & Split

Follow "Dose Guide & Split Rule"
(1.0 ml per 10 × 10 cm; split into first half / second half).

Amount of solution:
1ml per 10 x 10 cm

3

Topical placement

- Deposit droplets onto the treatment area.
- Spread evenly using a cotton bud or a sterile gloved finger.

4

Application

- **PASS 1 (FIRST HALF):**
 - » Face: 0.25–1.5 mm
 - » Body (if applicable): 2.0–2.5 mm
 - » Speed: fast (as tolerated)
 - » Pattern: vertical + horizontal lines
- **PASS 2 (SECOND HALF):**
 - » Reduce depth and speed to 50% (medium)
 - » Pattern: circular motion

Depth:
Face: 0.25-1.5 mm
Body: 2-2.5 mm
Speed: fast

Depth: reduce by 50%
Speed: medium

5

Aftercare

Follow "Universal Aftercare" (high SPF recommended).

VITAMINS.

NOURISH THE SKIN
FROM WITHIN

Indication:

Use **Revitalize Vitamins** for revitalizing and illuminating the skin. It's indicated when the primary complaint is dull, tired-looking skin that has lost its luster or when fine lines and early signs of aging are starting to appear due to oxidative stress. It's excellent for: sallow or asphyxic skin, uneven tone or slight dullness, preventative anti-aging in younger clients (20s-30s).

Professional application:

Apply to face, neck, décolletage and hands using device-assisted techniques such as microneedling or electroporation. Using the Revitalize Pen may speed up visible results.

Treatment plan:

Treatment: 1 session every 15 days, 6–8 sessions (according to results)
Maintenance: 1 session every 30 days

Contents (INCI):

Glutathione, Niacinamide, Vitamin C, Proline, Biotin, Folic Acid, Riboflavin, Glycine, Hyaluronic Acid (HA – 25 mg/vial), Leucine, Glutamine, Aspartic Acid, Arginine HCL

Packaging:

5 vials, 5 ml each.

Formula highlights:

It contains a powerhouse blend of vitamins, amino acids, minerals, and coenzymes – 69 essential nutrients in total – to revitalize dull or aging skin. This formula essentially replenishes what a stressed or nutrient-depleted skin lacks, restoring its healthy metabolism and radiance. Regular use of **Revitalize Vitamins** can brighten the complexion, improve fine lines, and enhance overall skin vitality.

VITAMINS PROTOCOL

1

Prepare & Cleanse

Follow "Universal Preparation & Cleansing".

2

Dose & Split

Follow "Dose Guide & Split Rule"
(1.0 ml per 10 × 10 cm; split into first half / second half).

Amount of solution:
1ml per 10 x 10 cm

3

Topical placement

- Deposit droplets onto the treatment area.
- Spread evenly using a cotton bud or a sterile gloved finger.

4

Application

- **PASS 1 (FIRST HALF):**
 - » Face: 0.25–1.5 mm
 - » Body (if applicable): 2.0–2.5 mm
 - » Speed: fast (as tolerated)
 - » Pattern: vertical + horizontal lines
- **PASS 2 (SECOND HALF):**
 - » Reduce depth and speed to 50% (medium)
 - » Pattern: circular motion

Depth:
Face: 0.25-1.5 mm
Body: 2-2.5 mm
Speed: fast

Depth: reduce by 50%
Speed: medium

5

Aftercare

Follow "Universal Aftercare" (high SPF recommended).

BODY.

TIGHTENS SAGGING SKIN

Indication:

Use **Revitalize Body** for skin flaccidity, slackness, or stretch marks. Indicated in cases of: body skin laxity, facial laxity, stretch marks (striae), textural issues post-laser or peel, general skin quality improvement.

Professional application:

Apply to face, neck, décolletage and hands using device-assisted techniques such as microneedling or electroporation. Using the Revitalize Pen may speed up visible results.

Treatment plan:

Treatment: 1 session every 15 days, 6–8 sessions (according to results)

Maintenance: 1 session every 30 days

Contents (INCI):

Dimethylaminoethanol Tartrate – 0.5%, Dexpanthenol – 1%, Methylsilanol Mannuronate – 0.05%

Packaging:

5 vials, 5 ml each.

Formula highlights:

It works by stimulating fibroblasts and remodeling collagen and elastin fibers, thereby “rebuilding” the skin’s support structure. The formula contains organic silica (methylsilanol) and other co-factors that are known for their skin-tightening and regenerative properties, as well as Dexpanthenol (pro-vitamin B5) for healing and hydration.

BODY PROTOCOL

1

Prepare & Cleanse

Follow "Universal Preparation & Cleansing".

2

Dose & Split

Follow "Dose Guide & Split Rule"
(1.0 ml per 10 × 10 cm; split into first half / second half).

Amount of solution:
1ml per 10 x 10 cm

3

Topical placement

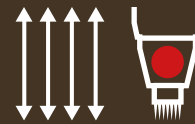

- Deposit droplets onto the treatment area.
- Spread evenly using a cotton bud or a sterile gloved finger.

4

Application

- **PASS 1 (FIRST HALF):**
 - » Face: 0.25–1.5 mm
 - » Body (if applicable): 2.0–2.5 mm
 - » Speed: fast (as tolerated)
 - » Pattern: vertical + horizontal lines
- **PASS 2 (SECOND HALF):**
 - » Reduce depth and speed to 50% (medium)
 - » Pattern: circular motion

Depth:
Face: 0.25-1.5 mm
Body: 2-2.5 mm
Speed: fast

Depth: reduce by 50%
Speed: medium

5

Aftercare

Follow "Universal Aftercare" (high SPF recommended).

HAIR.

STRENGTHENING HAIR MATRIX

Indication:

Revitalize Hair is indicated for nourishing the scalp and promoting hair growth in cases of: diffuse hair thinning, androgenetic alopecia (pattern hair loss), receding hairlines or temple thinning, thinning eyebrows or beard patches, hair transplant support, poor scalp vitality, in case of hair loss or simply wanting faster growth and better hair quality. Not for complete bald areas where follicles are dead (no product can resurrect dead follicles).

Professional application:

Apply to scalp or eyebrows using device-assisted techniques such as microneedling or electroporation. Using the Revitalize Pen may speed up visible results.

Treatment plan:

1 session every 7 days, maximum 6 sessions (according to results)

Contents (INCI):

Biotin, Caffeine, Panthenol, Ginkgo Biloba, Hyaluronic Acid, Propylene Glycol, plus supportive amino acids and botanicals (Glutamine, Glycine, Arginine HCl, Hydroxypropyl methylcellulose, EGCG)

Packaging:

5 vials, 10 ml each.

Formula highlights:

In effect, Revitalize Hair creates an optimal environment in the dermal papilla for hair regeneration. With regular treatments, clients often notice reduced hair fall, new baby hairs growing in sparse areas, and overall improved hair density and quality.

Mix with Booster (optional):

- Mix the contents of 2 ampoules of **Revitalize Booster** into 1 vial of **Revitalize Hair**.
- Shake until a homogeneous solution forms.
- Use the mixed solution immediately, following professional hygiene standards.

HAIR PROTOCOL

1

Prepare & Cleanse

Follow "Universal Preparation & Cleansing".

2

Dose & Split

Follow "Dose Guide & Split Rule"
(1.0 ml per 10 × 10 cm; split into first half / second half).

Amount of solution:
1ml per 10 x 10 cm

3

Topical placement

- Deposit droplets onto the treatment area.
- Spread evenly using a cotton bud or a sterile gloved finger.

4

Application

- **PASS 1 (FIRST HALF):**
 - » Face: 0.25–1.5 mm
 - » Body (if applicable): 2.0–2.5 mm
 - » Speed: fast (as tolerated)
 - » Pattern: vertical + horizontal lines
- **PASS 2 (SECOND HALF):**
 - » Reduce depth and speed to 50% (medium)
 - » Pattern: circular motion

Depth:
Face: 0.25-1.5 mm
Body: 2-2.5 mm
Speed: fast

Depth: reduce by 50%
Speed: medium

5

Aftercare

Follow "Universal Aftercare" (high SPF recommended).

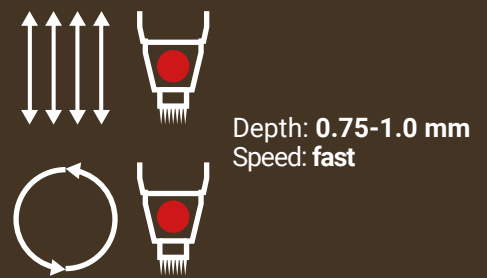

SPECIFIC HAIR TECHNIQUES

The following four treatment types use the same standard Hair protocol. Only the specific modifications are listed below. Please apply these adjustments to the universal Hair procedure as needed.

HAIR / BEARD REINFORCEMENT One session per week for a maximum of 6 weeks.

A strengthening protocol for early-stage thinning and weakened hair or beard quality, focused on improving scalp condition and supporting stronger-looking roots through consistent device-assisted application.

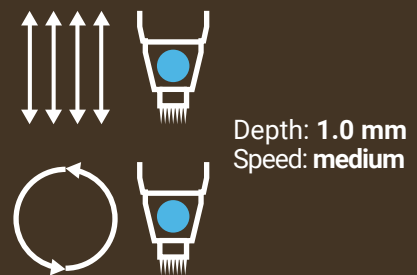

- **PASS 1 (FIRST HALF):**
 - » Depth: 0.75-1.0 mm
 - » Speed: fast (as tolerated)
 - » Pattern: vertical + horizontal lines
- **PASS 2 (SECOND HALF):**
 - » Pattern: circular motion

HAIR TRANSPLANT SUPPORT One session per week for a maximum of 6 weeks.

A supportive protocol for pre- and post-transplant care, designed to optimize scalp condition and improve the environment for graft stability and early growth. Use only according to clinic timing and tolerance.

- **PASS 1 (FIRST HALF):**
 - » Depth: 1.0 mm
 - » Speed: medium
 - » Pattern: vertical + horizontal lines
- **PASS 2 (SECOND HALF):**
 - » Pattern: circular motion

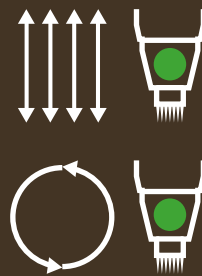

Use the Revitalize Laser Comb for fast, simple, and consistent application of Revitalize Hair by filling the container with the serum and combing slowly through the scalp for even distribution.

EYEBROW

One session per week for a maximum of 6 weeks.

A targeted protocol designed for sparse, uneven, or weakened eyebrows, focusing on improving the follicle environment and supporting denser-looking brow growth over time. Uses precise, low-trauma device-assisted application on the brow area, prioritizing control and symmetry.

- **PASS 1 (FIRST HALF):**
 - » Depth: 0.5 mm
 - » Speed: slow
 - » Pattern: vertical + horizontal lines
- **PASS 2 (SECOND HALF):**
 - » Pattern: circular motion

Depth: 0.5 mm
Speed: slow

ENHANCED

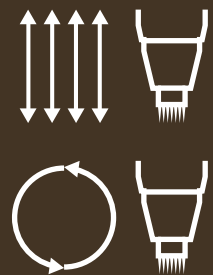

- First 3 weeks:
- Second 3 weeks:

Revitalize Booster and Hair for one session per week.
Revitalize Hair for one session per week.

A structured 6-week regeneration plan combining Booster + Pure in the first phase, followed by Vitamins to consolidate radiance and recovery. Recommended when the objective is accelerated renewal plus a brighter, more revitalized skin appearance.

Mix with Revitalize Booster in the first 3 weeks.

- **PASS 1 (FIRST HALF):**
 - » Depth: Hair and beard: 0.75-1.0 mm, Eyebrow: 0.5 mm
 - » Speed: Hair and beard: fast, Eyebrow: slow
 - » Pattern: vertical + horizontal lines
- **PASS 2 (SECOND HALF):**
 - » Pattern: circular motion

SLIM.

TARGETED FAT REDUCTION

Indication:

Revitalize Slim is indicated for localized fat accumulation and cellulite reduction. Common indications: submental fullness (double chin), abdominal pooch or love handles, thighs and buttocks with cellulite, upper arms “fat pockets”, bra-line fat or knee fat.

Professional application:

Apply to face, neck, décolletage and hands using device-assisted techniques such as microneedling or electroporation. Using the Revitalize Pen may speed up visible results.

Treatment plan:

Treatment: 1 session every 15 days, 6–8 sessions (according to results)

Maintenance: 1 session every 30-60 days

Contents (INCI):

Phosphatidylcholine – 3%, Sodium Deoxycholate – 2%. Carnitine, Insulin-like growth factor

Packaging:

5 vials, 10 ml each.

Formula highlights:

While not a weight loss solution, it effectively aids in inch loss and refining body contours when used in a series of treatments, especially when combined with a healthy lifestyle. Often results include a slimmer appearance in the treated zone and improvement in skin texture (less dimpling from cellulite).

SLIM PROTOCOL

1

Prepare & Cleanse

Follow "Universal Preparation & Cleansing".

2

Dose & Split

Follow "Dose Guide & Split Rule"
(1.0 ml per 10 × 10 cm; split into first half / second half).

Amount of solution:
1ml per 10 x 10 cm

3

Topical placement

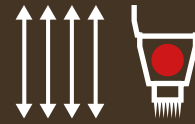

- Deposit droplets onto the treatment area.
- Spread evenly using a cotton bud or a sterile gloved finger.

4

Application

- **PASS 1 (FIRST HALF):**
 - » Face: 0.25–1.5 mm
 - » Body (if applicable): 2.0–2.5 mm
 - » Speed: fast (as tolerated)
 - » Pattern: vertical + horizontal lines
- **PASS 2 (SECOND HALF):**
 - » Reduce depth to 50%
 - » Pattern: circular motion

Depth:
Face: 0.25-1.5 mm
Body: 2-2.5 mm
Speed: fast

Depth: **reduce by 50%**
Speed: fast

5

Aftercare

Follow "Universal Aftercare" (high SPF recommended).

BRIGHT SKIN.

LIGHTENING HYPERPIGMENTATION

Indication:

Bright Skin is indicated for all types of hyperpigmentation – it lightens uneven skin tone and reduces brown spots (age spots, melasma, PIH). It restores radiance in dull, pigmented skin by inhibiting melanin formation. (Not for use on active rosacea.)

Professional application:

Apply to face, neck, décolletage and hands using device-assisted techniques such as microneedling or electroporation. Using the Revitalize Pen may speed up visible results.

Treatment plan:

Treatment: 1 session every 15 days, 6–8 sessions (according to results)
If desired results are achieved before the 8 applications, the protocol can be suspended.

Contents (INCI):

Kojic Acid – 0.9%, PEG-35 Castor Oil – 0.4%, Glycyrrhiza Glabra Root Extract – 0.3%, Aspergillus Ferment, Plus supportive actives: Retinol, Salicylic Acid, Hyaluronic Acid, Morus Alba, Tocopherol

Packaging:

5 vials, 5 ml each.

Formula highlights:

The formula features kojic acid, retinol, salicylic acid, and licorice extract to inhibit melanin production and encourage gentle cell turnover. Hyaluronic acid and vitamin E provide hydration and barrier protection throughout the treatment process.

BRIGHT SKIN PROTOCOL

1

Prepare & Cleanse

Follow "Universal Preparation & Cleansing".

2

Dose & Split

Follow "Dose Guide & Split Rule"
(1.0 ml per 10 × 10 cm; split into first half / second half).

Amount of solution:
1ml per 10 x 10 cm

3

Topical placement

- Deposit droplets onto the treatment area.
- Spread evenly using a cotton bud or a sterile gloved finger.

4

Application

- **PASS 1 (FIRST HALF):**
 - » Face: 0.25–1.5 mm
 - » Body (if applicable): 2.0–2.5 mm
 - » Speed: fast (as tolerated)
 - » Pattern: vertical + horizontal lines
- **PASS 2 (SECOND HALF):**
 - » Reduce depth and speed to 50% (medium)
 - » Pattern: circular motion

Depth:
Face: 0.25-1.5 mm
Body: 2-2.5 mm
Speed: fast

Depth: reduce by 50%
Speed: medium

5

Aftercare

Follow "Universal Aftercare" (high SPF recommended).
